

ONLINE RESUME BUILDER USING DJANGO

Project Documentation

Abstract

The Online Resume Builder is a web-based application developed using Django. It allows users to enter personal, educational, professional, and technical details and automatically generates a professional resume.

Objectives

- Develop a web-based resume generation system.
- Simplify resume creation.
- Generate professional resumes dynamically.

Technologies Used

Frontend: HTML, CSS
Backend: Python, Django
Database: SQLite3
IDE: Visual Studio Code

Modules

Personal Information, Professional Summary, Education, Work Experience, Skills, Projects, Certifications, Achievements, Languages, and Interests.

Conclusion

The Online Resume Builder automates resume creation and demonstrates practical web development using Django.

Detailed Project Report

This project can be extended with PDF export, user authentication, multiple templates, and database storage.
